Breathing Issues?

## Reactive Airways Dysfunction Syndrome *it can mimic asthma*

- Has the air quality in your environment changed due to a chemical exposure, gas, smoke, sulphur, vapours or dust?
- Do you work in an occupation that exposes you to chemicals, smoke or dust?
- Do you have breathing issues and hyper reactivity when exposed?
- Do the following now affect your breathing?

*perfume – petrol fumes – aftershave – smoke – spray fresheners  
spray deodorants – fragrant lotions – laundry detergent – paint etc.*

## YOU ARE NOT ALONE!

RADS is a condition whose symptoms *mimic asthma* and for some, traditional asthma medications don't work or they may make breathing issues worse.

### **When you can't breathe.. nothing else matters!**

This is extremely frightening and is life threatening!
